## **QUALITY REFERENCE according to the IPC-A-610F standard**

ACE electronics uses the standard IPC-A-610F, called "Acceptability of Electronic Assemblies - July 2014", as the basic reference for the required quality of all electronic assemblies.

All activities are carried out in accordance with the recommendations of this standard, but the operational staff is administratively not IPC-qualified.

In consultation with the customers, the quality delivered is continuously monitored at all levels in the spirit of this IPC standard and, where necessary, adjusted during the production process.

The results are registered and reported at regular intervals in accordance with the guidelines stated in the internal ISO-9001: 2015 quality system.

ACE electronics N.V.
