## QUALITY POLICY from ACE electronics N.V.

ACE Electronics strives to provide reliable, tailor-made solutions for its customers, such as printed circuit boards, total assemblies, construction equipment, testing and packaging and shipping, in combination with all logistical support.

At the same time, ACE electronics strives for a personal relationship of trust with its customers and long-term cooperation.

The intention is that the customer has a good feeling when working with ACE Electronics.

To ensure quality and fixed procedures, some customers require ACE Electronics to comply with the ISO9001-2015 standard.

ACE electronics uses ISO9001 not only to have the certificate, but a tool to support the continuous pursuit of quality, to work on it and to strive for improvements.
